

---

Step 1: Download all files necessary from Github

- Go to the link <https://github.com/apieceofbaggage/trashcraftmodpack>
- Click on "Code". This will open a dropdown menu, from which you should select "Download ZIP"
- Once it is downloaded, extract the files
  - On macOS: simply double click the downloaded file (trashcraftmodpack.zip) in Finder
  - On Windows: right click on the downloaded file in File Explorer and click "Extract Now"
- You have now downloaded all necessary files and extracted them to a folder labeled "trashcraftmodpack"

Step 2: Install Forge

- Open the forge .jar file in the new folder
  - You will likely be told that it can't be opened, unidentified developer, bla bla bla
    - On macOS: press OK, then click on the Apple logo on the top left, then system preferences -> security and privacy, then click "Open Anyway"
    - On Windows: click on more details, followed by run anyway
- It will pop up with the Forge installer. Make sure that it has "Install Client" selected, then press "OK".
- Forge is now installed.

Step 3: Put the Mods into the Mods Folder in .minecraft

- Open up Minecraft and get into the game itself
- Go into options, open up the resource pack selector, and press "Open Resource Packs folder"
- To go back into the main .minecraft folder (from the resource packs):
  - On macOS: press the command key and the up arrow at the same time
  - On Windows: look at the top of File Explorer to where you see a this looking thing:

Click on ".minecraft"

- Once you are in the main .minecraft folder, you should now see a folder called "Mods". Go into that folder.
- Take the files from the modpack folder and drag them into the "Mods" folder. Do **not** drag the folder in. Select all of the mods using cmd+a (macOS) or ctrl+a (Windows) and drag them in.
- The mods are now ready to use.

Step 4: Play

- Make sure that to the left of the big "Play" button, it shows the Forge profile that you saw in installations.
  - If not, click on that area and scroll until you see the Forge profile, then click on it
  - You can also use this to get back to Vanilla Minecraft when you're done.
- Press play.
  - It will take time for all the mods to load up, but not too long.
- Now just join the server like any other multiplayer server. The IP is trashcraft.ddns.net
